State Software Engineer with expertise in developing critical software products within international environments. Involved in the full project lifecycle -from business scoping to Go-Live- I combine a consultative approach with technical mastery of the Java Spring, React, React Native, and Oracle APEX ecosystems. I aim to leverage this dual skill set to engineer high-performance solutions for your organization

Education

State Engineering Degree in Software Engineering & Distributed Systems (GLSID) 2022 - 2025
ENSET Mohammedia

Associate Degree in Physics (DEUG SMP) 2020 - 2022
Faculty of Sciences Ben M'Sik, Casablanca

Technical Skills

- **Development** : Java (Spring Ecosystem), JavaScript (React, React Native, Expo), Python, PL/SQL
- **Data & Tools** : Oracle APEX, Oracle DB, PostgreSQL, Docker, Keycloak, Git/GitLab, Jira
- **Architecture** : Microservices, APIs REST, MVC, Design Patterns, System Design

Professional Experience

SQORUS | Software Engineer (Full-time) August - Present 2025

Played a key role in the overhaul of a critical financial close management system for Linxens, an international group

- Developed key modules and complex APIs/ PL/SQL procedures to optimize data processing pipelines
- Significantly reduced end-to-end processing time and increased user satisfaction by 50%

Stack : Oracle APEX, PL/SQL, Oracle Database, OCI, JavaScript, HTML5, CSS3, APIs REST

SQORUS | Software Engineer (End-of-Studies Internship) February - July 2025

Designed and deployed a configurable digital solution (Web & Mobile) for the operational management of airport services (real-time flight tracking, billing, ground services) on an international scale

- Built modern and intuitive Web & Mobile user interfaces
- Designed and exposed secure REST APIs to power the mobile application (React Native)

Stack : React Native, Redux, Oracle APEX, PL/SQL, Oracle DB, JavaScript

Onedustry Technologies | Software Engineer (Intern) July - September 2024

Developed the MVP of a Fintech mobile application dedicated to money transfer and instant payments, based on a Microservices architecture with biometric authentication

Stack : TS, React Native, Expo, SpringBoot, KeyCloak, Microservices, Docker

WEBEX-IT | Frontend Developer (Intern) August - September 2023

Enhanced the web interface of a subscription management application

Stack : React, JavaScript, Bootstrap, JQuery, HTML, CSS

AJYALONA Training Center | Computer Science Instructor (Part-time) February - June 2023

Provided academic support in C/C++ programming and Linux for 2nd year university students

- Demonstrated strong pedagogical and interpersonal skills; students achieved top scores (18/20 and 17/20)

Projets

westreakers.com (In Progress)

A gamified community platform for managing shared goal streaks. Users engage in communities, track progress, maintain collective streaks, and access motivating leaderboards

Stack : Spring Boot, React.js, PostgreSQL, JUnit, Docker

Vectra AI (Chrome Extension powered by AI) | <https://github.com/Vectra-Project/>

Project aiming to simplify and personalize the job search process with features such as matching scores, personalization, and CV improvement

Stack : Spring Boot, FastAPI, React, Plasmio, Gpt4o API, JWT

Certifications & Awards

React Diploma (6 mois)

almdrasa.com

APEX Foundations

Oracle Academy

MNPC 2023 Finalist

Moroccan National

Programming Contest

N7 CTF 1st Prize

ENSET-M CTF 2024

Langues

Arabic : Native

English : Fluent

French : Fluent
